Application/Control Number: 10/688,679 Page 2

Art Unit: 2622

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. Note MPEP 606.01.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Subramanian et al.

The system of Subramanian (noting particularly Fig. 1 and 2) involves digital video devices including a digital television (e.g. col. 1 lines 21-25) that receives an MPEG-formatted A/V stream (noting input 32 in Fig. 1) to be decided. A host CPU 34 is included in video decoder 30 (Fig. 1), and ASIC 36 (detailed in Fig. 2) includes RISC element 80 that serves as a local CPU (col. 5 lines 41-44). In instances when the decoder arrangement operates in a trick-play mode (i.e. "abnormal" state), the decoder cannot operate adequately under the control of the host CPU, so the local CPU instead takes over control of the mode operation (col. 7 lines 25-40). Host CPU (in association with stage 37) is prompted by the user through input device 33 (Fig. 1) which serves as the programmable logic device that carries out the switching to the local CPU in ASIC 36 when the user selects the trick-play mode.

Application/Control Number: 10/688,679 Page 3

Art Unit: 2622

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patent # 6,012,137 covers a detailed description of ASIC 36 referred to in col. 4 lines 37-40 of Subramanian.

- 4. Claims 2-12 appear allowable over the prior art.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor R. Kostak whose telephone number is (571) 272-7348. The examiner can normally be reached on Monday Friday from 6:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David W. Ometz can be reached on (571) 272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

Any response to this action should be mailed to:

Art Unit: 2622

Commissioner of Patents and Trademarks P.O. Box 1450 Alexandria, Virginia 22313-1450

Or faxed to:

(571) 273-8300

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Customer Service Office whose telephone number is (703) 308-HELP.
